

Counting

Jonathan Murray - 3439348

Gustavo didn't know how to write many numbers, but damn he could count. When I initially started to solve this problem I didn't think the answers would get too big. When I started to get overflow errors, I changed my variable type to BigInteger and everything worked. I figured out a simple equation to the problem by finding a pattern in the answers (this did take more time than I'd like to admit). Solid problem!
